

NXP Investor Presentation

Third Quarter 2019

October 2019

SECURE CONNECTIONS
FOR A SMARTER WORLD

Forward-Looking Statement

This presentation includes forward-looking statements which include statements regarding NXP's business strategy, financial condition, results of operations, and market data, as well as any other statements which are not historical facts. By their nature, forward-looking statements are subject to numerous factors, risks and uncertainties that could cause actual outcomes and results to be materially different from those projected. These factors, risks and uncertainties include the following: market demand and semiconductor industry conditions; the ability to successfully introduce new technologies and products; the end-market demand for the goods into which NXP's products are incorporated; the ability to generate sufficient cash, raise sufficient capital or refinance corporate debt at or before maturity; the ability to meet the combination of corporate debt service, research and development and capital investment requirements; the ability to accurately estimate demand and match manufacturing production capacity accordingly or obtain supplies from third-party producers; the access to production capacity from third-party outsourcing partners; any events that might affect third-party business partners or NXP's relationship with them; the ability to secure adequate and timely supply of equipment and materials from suppliers; the ability to avoid operational problems and product defects and, if such issues were to arise, to correct them quickly; the ability to form strategic partnerships and joint ventures and to successfully cooperate with alliance partners; the ability to win competitive bid selection processes to develop products for use in customers' equipment and products; the ability to achieve targeted efficiencies and cost savings; the ability to successfully hire and retain key management and senior product architects; and, the ability to maintain good relationships with our suppliers. In addition, this document contains information concerning the semiconductor industry and NXP's business generally, which is forward-looking in nature and is based on a variety of assumptions regarding the ways in which the semiconductor industry, NXP's markets and product areas may develop. NXP has based these assumptions on information currently available, if any one or more of these assumptions turn out to be incorrect, actual results may differ from those predicted. While NXP does not know what impact any such differences may have on its business, if there are such differences, its future results of operations and its financial condition could be materially adversely affected. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak to results only as of the date the statements were made. Except for any ongoing obligation to disclose material information as required by the United States federal securities laws, NXP does not have any intention or obligation to publicly update or revise any forward-looking statements after we distribute this document, whether to reflect any future events or circumstances or otherwise. For a discussion of potential risks and uncertainties, please refer to the risk factors listed in our SEC filings. Copies of our SEC filings are available on our Investor Relations website, www.nxp.com/investor or from the SEC website, www.sec.gov.

NXP Investment Thesis

Market Leader in Growing Markets

Focused on Strong Profitable Growth

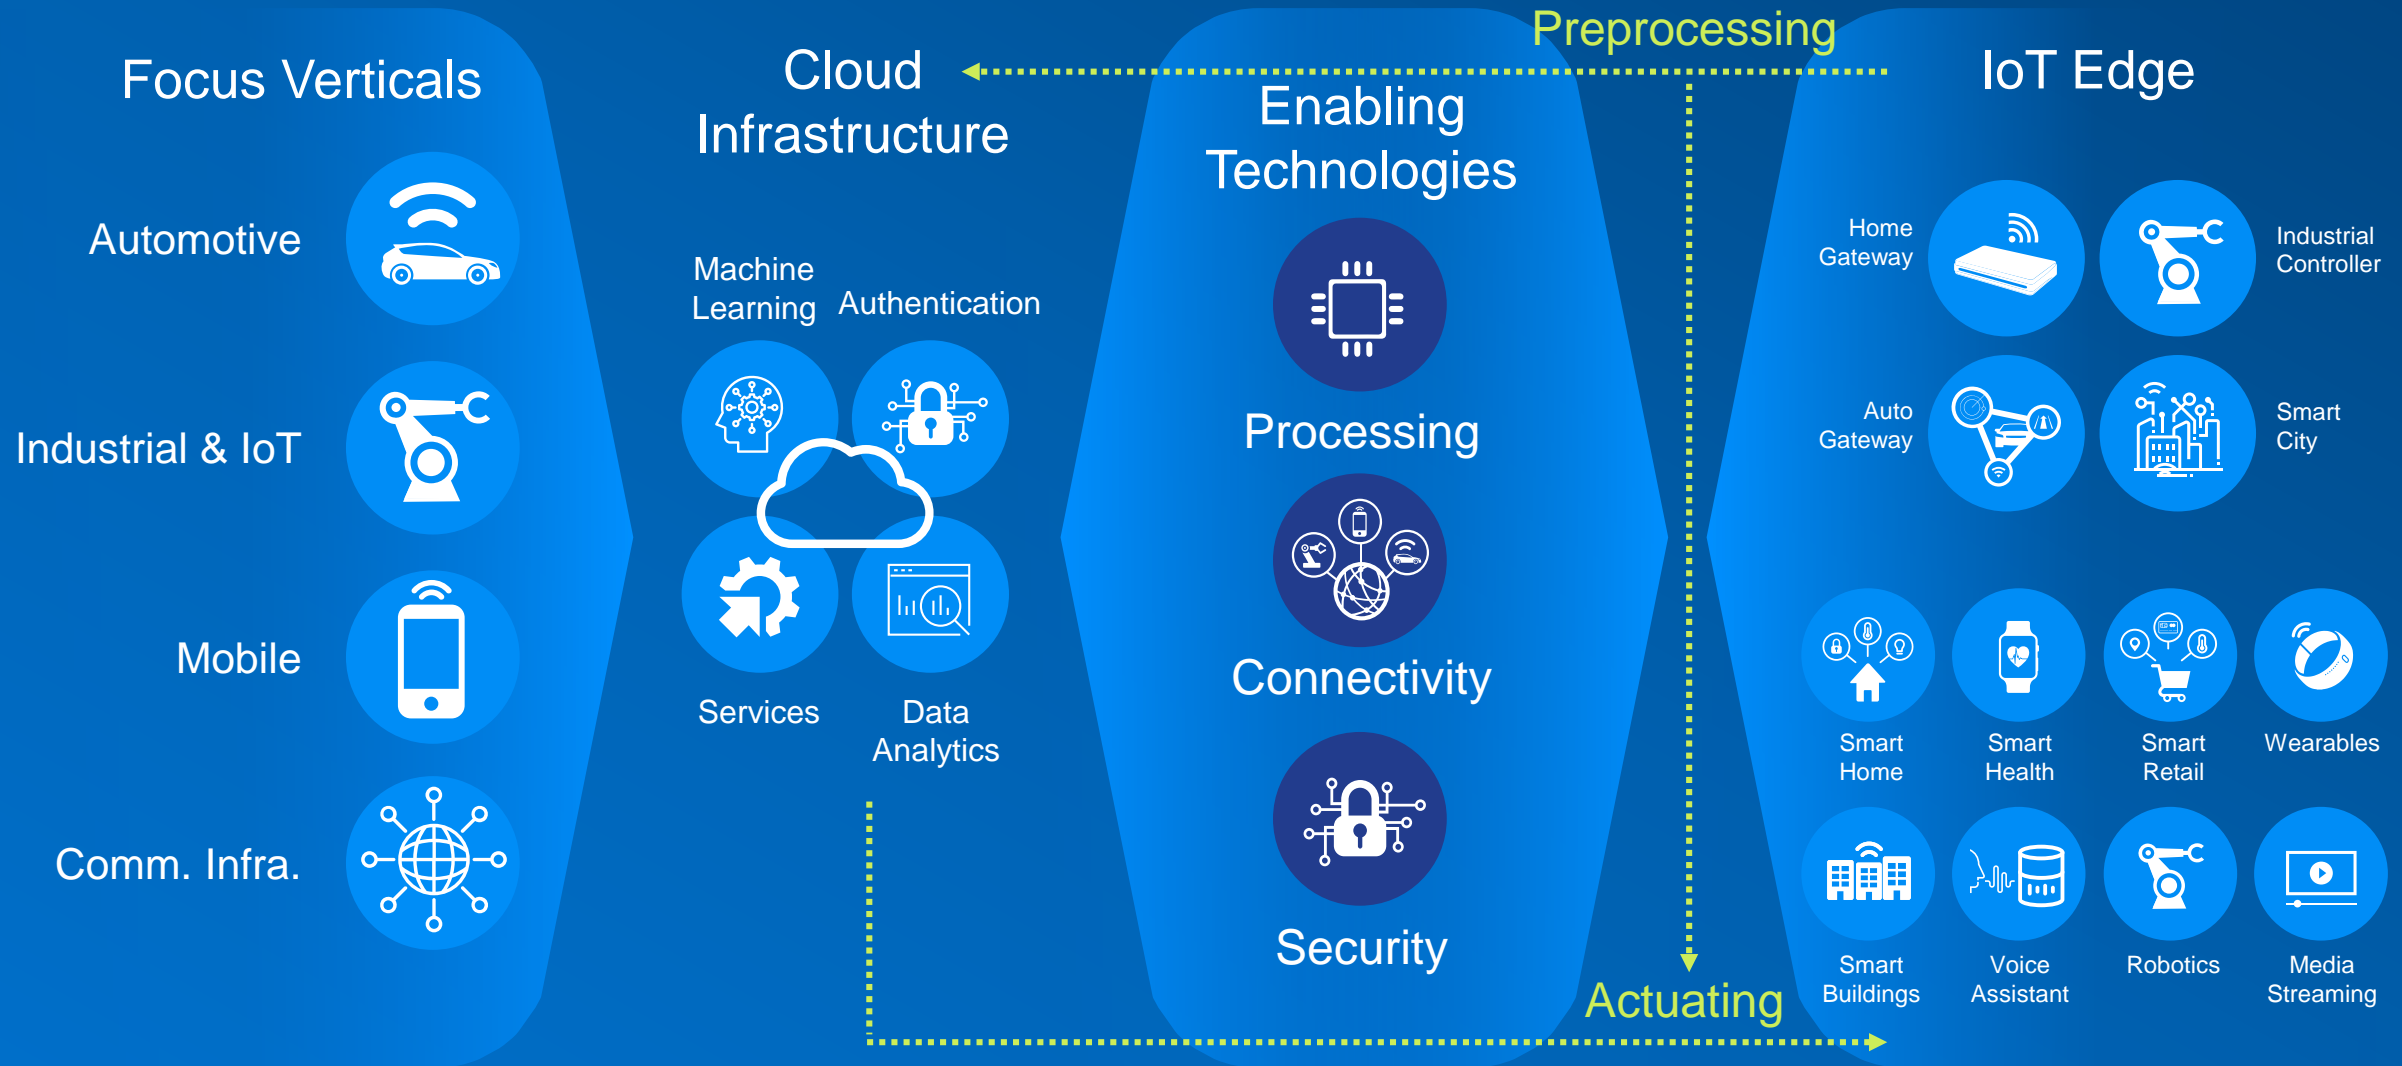

Shareholder Friendly

All Excess Cash Returned to Shareholders

Secure Connections for the Smarter World... has Evolved

NXP Addresses 4 Major End Markets

Automotive

ADAS + Electrification

System solutions innovation with OEMs

Increased content drives growth

Industrial & IoT

Fragmented customer base

Processing needs are transforming markets

Scalable solutions as a differentiator

Mobile

Large mobile and adjacent device market

Continued demand for features - innovation

Growth driven by increased attach rate

Communication Infrastructure & Other

Capex-driven wireless infrastructure market

Secular growth due to new cellular standard

Focused Leadership – End Markets^{1,2,3}

NXP 2018 Revenue
by End-market Exposure

Broad end market exposure

- Long product life cycles
- High barriers to entry
- Application expertise

Recognized leadership in

- Automotive
- MCU and application processors
- Mobile transactions
- RF power solutions
- Secure identification, mobility, RFID

Growth Opportunity Driven by Focus End Markets¹

Growth by End Market

End Market	Percent 2018 Revenue	2018A – 2021E 3-yr. CAGR
Automotive	48%	Up 7 to 10%
Industrial & IoT	19%	Up 8 to 11%
Mobile	12%	Up 4 to 6%
Comm. Infra. & Other	19%	0 to up 2%
Total		Up 5 - 7%

Automotive – NXP Leads, Accelerates in New Areas^{1,2}

Revenue

Growth drivers

- New business – above market growth
 - ADAS / radar, vehicle networks, electrification
- Core business – at market growth
 - Connected infotainment, powertrain, secure car access

Market

Value proposition

- Solution portfolio
- Innovation power
- Automotive safety & reliability

Industrial & IoT – Highly Diversified^{1,2,3,4}

Growth drivers

- Processing
 - 32bit microcontrollers & cross-overs
 - IoT application processors
 - Analog mixed-signal & connectivity

Value proposition

- Broad, scalable solutions
- Common S/W tool environment
- Deep application insights
- Channel reach
